SUMMARY

Solo founder with product management experience. I build and ship software end-to-end with AI coding agents, and previously led product at an early-stage proptech startup. B.A. in Computer Science from Harvard.

EXPERIENCE

Dimensions · Solo Founder Summer 2025 – Present

Platform to build, share, buy, and sell microbrowsers · Lettuce Labs LLC

- Invented the microbrowser: an internet wrapper that packages websites, widgets, agents, and code execution into one custom interface for a specific community or workflow.
- Built a microbrowser builder and runtime, end-to-end with Claude Code, so anyone can make, share, buy, and sell their own; stack: Electron, TypeScript, Clerk, Neon Postgres, Vercel, Cloudflare.
- Validated demand by helping a creator build a K-pop microbrowser in a weekend; its launch reel hit 65K likes and 1,300 waitlist signups in days.

FrontlineFrames.com · Co-Founder Feb 2026 – Present

Online store where car dealerships design, customize, and purchase their own license plate frames

- Built and operate the online store end-to-end, currently generating revenue.
- Run customer acquisition through Google Ads, with product analytics in PostHog.

Woodenfish Foundation · Fellow Summer 2024

International Buddhist monastic and scholarly organization founded by Venerable Dr. Yifa (Yale PhD)

- Completed the Humanistic Buddhist Monastic Life Program at Woljeongsa Monastery, South Korea: an intensive residency in monastic discipline, meditation, and Buddhist studies led by monastics and scholars.

Chat University · Co-Founder Summer 2023

AI chatbot for higher education using retrieval-augmented generation (RAG)

- Built an early RAG chatbot for universities on GPT-3.5-era models, with a working demo, before RAG was common practice.
- Raised \$50K in pre-seed funding and ran a sales process with universities, before pivoting into the abyss.

Nobee · Head of Product Jun 2021 – Jan 2022

\$8M pre-seed startup replacing the commission model for real-estate agents with an app-based gig economy

- Led product and managed a team of 11 engineers, 4 designers, and 2 data analysts; ran A/B testing and analytics, and shipped internal agent-scheduling and admin tools.

SELECTED PROJECTS

- **DemocraChat:** GPT-powered letter writer for activists; MVP (savetiktokai.com) sent 100+ letters to Congress.
- **RealAssist:** My first venture, a proptech startup incubated at the Harvard Innovation Labs and VentureWorks accelerator.

EDUCATION

Harvard University: B.A. Computer Science, Secondary in Government · Dec 2024

Tappan Zee High School: Valedictorian · 2018

SKILLS

AI: Claude Code, Codex, Cursor, Gemini CLI · **Eng:** TypeScript, React, Node, Python, SQL, Electron, Next.js · **Product:** PRDs, user research, A/B testing, Figma
